**Women Who Take College Degrees as Much a Success at Housekeeping as Her So-called Domesticated Sisters—One Accomplishment Always Leads to Many—Parting Hair on One Side Not Becoming to Everyone—Irregularity of New Coiffures—The New Neck Chatelaine—Pretty Idea For a Fan Bag.**

## THE BEAUTY OF ONE TALENT

The proper study of womanhood is woman. So said the great Pope, I spent a few days in a woman's boarding house recently, and, without showing vulgar curiosity, I took a great interest in my companions and managed to find out how most of their days were spent.

Some of them were girls in the early twenties and were engaged in shops and offices. A few more elderly women with small incomes, who found life in a boarding house congenial and cheap. But the great majority were women from 25 to 40, and almost without exception they were engaged in "learning something, with a view to earning their own living later on."

Those who had situations were poorly paid and overworked. Not because they were incompetent but because they had not specialized at the correct training age between 18 and 22. At the ages of 25 and 30 a woman feels that she cannot afford to spend years in learning, and, besides this, she has, to some extent, lost her fresh power of concentration which was cultivated in her school days. Accordingly she looks for something that will not take long to learn and will not require too strenuous brain work.

Even if marriage does cut short a promising career and make the training seem a waste of time and money, the girl who can do one thing well is the one who is a success in other lines, and her house will undoubtedly be run in a more businesslike and comfortable way than that of her so-called domesticated sisters, who can do nothing thoroughly.

The most delightful houses to visit among my acquaintances are those belonging to certain women who took their college degrees and spent their

time until marriage in teaching or in similar occupations. The husbands have gained companions as well as cooks and housekeepers, and the concentration that enabled those women to gain their degree is now turned to making their wifehood a success. They certainly do play golf or tennis or walk for exercise. They play with their husbands on equal terms. The fact that they have one accomplishment puts them on a footing with the learned class.

One accomplishment always leads to many. So the parents who allow their daughters to sit down and wait on the chance of a husband's turning up are sadly neglecting their duty. Remember: The day is past when women take pride in saying, "I never did a day's work in my life." Such pride is that of idiots.

## STYLES OF COIFFURE

Parting the hair on one side is in some cases very becoming and in others it gives almost too rakish an effect to be pretty and feminine. It depends very much on how it is done and upon the general good taste of the wearer. The fashion really has its good points, however, and the greatest of these is that it rests the hair. Women's heads have been so overburdened with artificial pompadours, puffs, curls and the like that the hair and scalp have suffered considerably and the recent radical departure in style has helped our natural crop not a little and afforded greater comfort.

The absence of puffs and pompadours has reduced our heads to something like a natural size and for summer the difference is a matter for rejoicing.

There is no reason that the fashion should be unbecoming and most of

those who find it so are more blessed by the absolute change it makes in appearance, for, of course, one's reflection in the mirror does give one a shock until one grows used to it. However, if the trouble lies deeper than this and the part really is unbecoming do not despair until you have tried the part on the opposite side. You know a man often changes the part from one side to the other to hide a bald spot or for some other reason best known to himself and you know how different he looks after doing so. Just so with a woman! Since the two sides of the face are alike it is natural that a different arrangement of the hair will produce different effects.

Perhaps that is the greatest charm of the new coiffure, this irregularity—and the same is true of the new clothes. We had grown so tired of the geometrical precision in our garments that now we have gotten used to having one side looped up and the other hung down it is hard to say just where we shall stop.

## THE NECK CHATELAINE

The neck chatelaine has almost put the necklace out of fashion this summer. Partly because it is inexpensive, but chiefly because it is a novelty that has a distinct use. On to the neck chatelaine, which is merely a yard long strip of inch and a half wide black and white striped ribbon, is hung either a jeweled change purse or a jeweled vanity mirror. Both are of infinitesimal size, as small as ever was a locket, but the one holds enough carfare for a trip downtown with a glass of soda water or a frappe thrown in, and at the back of the other is a tiny mirror large enough, however, to reflect the tip of a pretty nose and say whether it needs a dusting with the powder rag concealed in the base of the receptacle.

## WREATHED FAN BAGS

Even the inconspicuous little bag of pale toned satin which holds the tiny fan of satin and mother of pearl now is decorated on at least one side of its exterior. Ribbons and garlands of satin, tinsel and chiffon in delicate shades of blue, mauve, green and yellow are placed flatly against the folds of the bag and give it distinct character in contrast to its plainness of yesterday. And as though these floral decorations were insufficient, the ends of the ribbon hangers are joined under a tiny nose, so that when the bag is slung from the wrist the effect may be pretty.

## A R. McIntyre Drug Co.

is Authorized to Refund Your Money if WENDELL'S AMBITION PILLS do not Banish all Nerve Troubles and put Vigor and Energy into your Body.

Are you a dead one? Have you lost ambition? Do you get up tired in the morning? Do your hands tremble? Are you despondent? Have you lost confidence in your ability to do things?

Don't give up; arouse yourself right now. Go to A. R. McIntyre Drug Co. and get a fifty-cent box of Ambition Pills. You don't have to wait a week to know whether they are doing you good or not. You'll feel better tomorrow. You'll feel full of vim and vigor in three days and after you have taken one box of this marvelous, upbuilding prescription, you'll be your old vigorous, energetic self again.

One box of Ambition Pills is a good as a two weeks' vacation. For nervous troubles, tired feeling, exhausted vitality, hysteria, loss of appetite, kidney and liver complaints they are simply splendid. Box of Wendell's Ambition Pills 50 cents at A. R. McIntyre Drug Co. and dealers everywhere. Mail orders filled by Wendell's Pharmaceutical Co., Syracuse, N. Y.

## SAYS IDAHO PROJECTS SHOULD BE FINISHED

Boise, Ida., Oct. 20.—That Idaho should follow the lead of Oregon and Washington in joining hands with the reclamation service to complete its half finished irrigation projects and again turn the tide of immigration to the northwest, is the opinion of F. H. Newell, director of the reclamation service and regarded as one of the most practical men in that branch of the government. Mr. Newell arrived in Boise today. He has been in the service since it began its work and has watched the progress of every irrigation project started by the government.

"The time has come when irrigation houses are worthless in the east," stated Mr. Newell, "and it is absolutely useless to launch any project with private capital, as the people have lost confidence in irrigation projects not backed up by the government or state."

"Oregon is in the same boat as Idaho. It has a number of half completed projects upon which people have settled and who, without a sufficient

Captain H. E. Honeywell was one of Uncle Sam's two representatives in the recent balloon race in Europe for the international cup.

amount of water, are having a hard struggle to get along. That state, however, has put up \$40,000 and the reclamation service a like amount and an investigation is being conducted by the reclamation service engineers to ascertain the feasibility of completing the projects. If conditions are found favorable the state and reclamation service will join hands in the work. Washington is doing the same thing."

## Effective, Economical Complexion Beautifier

(Julia Orff in the Clubwoman)

One reason I so strongly recommend mercolized wax is that it really takes the place of several different cosmetics, saving time, patience and expense. It is better than any cleansing cream, better than any massage cream and better than any rouge, for accomplishing the results for which such articles are used. As the wax actually absorbs an old faded or discolored cuticle, a little each day, the underlying skin which gradually appears, is clearer, softer, healthier and more youthful than any cosmetic-made complexion. Spreading on a thin coat of this wax at night, washing it off morning, in a week or so produces a marvelous transformation. Just one ounce of mercolized wax, obtainable at any drugstore, will do the work. There's nothing better to remove freckles, moth patches, liver spots, sallowness, blotches, pimples or blackheads.

For wrinkles and loose, saggy skin, I invariably recommend a face bath made by dissolving 1 oz. powdered saxolite in 1-2 pt. witch hazel. This has remarkable astringent and tonic properties. (Advertisement)

## NEW YORKER WANTS TO INVEST IN UTAH

Salt Lake, Oct. 21.—A Rochester, N. Y., man has \$10,000 to invest in Utah, according to a letter received by F. Collett, secretary of the Manufacturers Association of Utah. He says that he will invest his money and also his services, if favorable opportunity is offered. He says that he was led to notice the opportunities in the intermountain country by an article in the Western Pacific time table which was furnished by Mr. Collett.

## SCARLET DISCUSSES "DIAMONDFIELD JACK"

Salt Lake, Oct. 21.—According to Samuel Scarlet, secretary of the Salt Lake local, No. 69, of the Industrial Workers of the World, "Diamondfield Jack" Davis is not recognized as a factor in the visit of "Tom" Mann to this city and his programmed speech to the working men in the Garrick theater on the night of November 9. Concerning the question, Mr. Scarlet said:

"The action of Davis in wiring the immigration officers at Washington, asking that Mann be deported is of a part with his other actions on questions concerning the I. W. W. He is making a bid for the spotlight. Any lawlessness that might occur in which Davis and the I. W. W. figured will have to be of his starting. He would have the citizens of Salt Lake believe that he is an asset to the safety of the community and that Salt Lake is in need of him to protect it from us."

"The citizens of Salt Lake may rest assured that we will not even tax the police with preserving order in connection with any meeting or other demonstration that we may promote. We maintain the right of free speech—not of causing disturbance of any sort."

## REPORT DENIED BY STEAMSHIP COMPANY

New York, Oct. 20.—The report to the effect that the beef trust had cornered all the cold storage facilities on steamers plying between Argentina and this country was denied today by Lorenzo Daniels, local head of the Lamport & Holt Steamship company. His denial, however, shows how important the importation of meat from the South American republic has become.

"Two of our ships have already been fitted with refrigeration capacity for 4000 cubic tons," he said, "and the others will be so fitted as quickly as possible. We anticipate that within the next six months there will have been accomplished and the ships carrying that amount of beef each voyage."

He declared that on the voyage which the beef trust is accused of having contracted for the entire cold storage space of the steamer Van Dyke, only 400 tons of beef were carried.

## SAGE TEA KEEPS YOUR HAIR DARK

When Mixed with Sulphur It Brings Back Its Lustre And Abundance.

Gray hair, however handsome, denotes advancing age. We all know the advantages of a youthful appearance. Your hair is your charm. It makes or mars the face. When it fades, turns gray and looks dry, wispy and scraggly just a few applications of Sage Tea and Sulphur enhances its appearance a hundred-fold. Don't stay gray! Look young! Prepare the tonic at home or get from any drug store a 50-cent bottle of "Wyeth's Sage and Sulphur Hair Remedy." Thousands of folks recommend this ready-to-use preparation, because it darkens the hair beautifully and removes dandruff, stops scalp itching and falling hair. Besides, no one can possibly tell, as it darkens so naturally and evenly. You moisten a sponge or soft brush with it, drawing this through the hair, taking one small strand at a time. By morning the gray hair disappears; after another application or two, its natural color is restored and it becomes this, glossy and lustrous, and you appear years younger. Agents, A. R. McIntyre.

## IDAHO ATTORNEY DIES IN MID-OCEAN

Boise, Ida., Oct. 20.—A wireless message received here today from the steamship Hamburg announced the death of D. D. Williams of this city, a prominent member of the Idaho bar. Death overtook Mr. Williams last Thursday while he was en route home from a trip abroad. The message arrived this morning via Siasconset, Mass. The body will be brought to this city for interment.

The news of Mr. Williams' death was received with a shock in this city by relatives and friends, for letters previously received from him gave no indication that he was ill. His trip abroad, with Mrs. Williams, had been for pleasure, and was spent in Italy. It is estimated that his estate here is worth \$75,000.

## STIFF FOOTBALL PRACTICE

Minneapolis, Oct. 21.—The defeat of Minnesota by Nebraska Saturday has stiffened the practice at Northrup field and yesterday instead of perfunctory signal drill, the coaches sent the team into hard scrimmage. Coach H. R. Williams took steps to cancel the game with North Dakota scheduled for next Saturday. North Dakota has been badly beaten this season and Dr. Williams is looking for a team that will give him a harder battle. It is possible that St. Thomas College of St. Paul will be substituted.

## SCOTCH PINE ON UTAH FORESTS

Forman T. McLean, assistant director of the Utah experiment station, was in Ogden today en route to Johns Hopkins university, Baltimore, where he takes up a line of research work during the winter months. He reports excellent progress in silviculture at the forest experiment station, especially the experiments in reforesting brush and burned over lands. The success has been due very largely to remarkably favorable weather conditions this year, as the rainfall on the Mantle forest for the three summer months exceeded six inches.

The experiments with different species of trees developed rather surprising results. Two introduced European trees, the Scotch pine and Norway spruce, have surpassed any native species in their growth—in fact these tree immigrants seemed to adapt themselves as readily to American conditions as do the human immigrants.

A new planting machine was also

## TREE TEA

tested out this summer, and gave very satisfactory results with all kinds of evergreen trees. It is very difficult to transplant the evergreen forest trees and the great care necessary in handling them, as well as the uncertainty of results, has greatly hindered the work of reforestation. If this new planting device continues to show as good results in the future it will be of great usefulness in reforesting the mountains of the western states. Studies have also been conducted with the Utah aspen on the central Utah forests. This timber is the main source of supply of mining props for the coal mines of that region. The logging and shipping of this material has developed into a flourishing industry in the San Pete valley and adjoining country. The prop business utilizes very small timber—trees from seven to nine inches in diameter being preferred. The returns obtained from this kind of timber are relatively large, the quality sometimes exceeding 10,000 linear feet to the acre, thus giving a return to the government for the stumpage alone of as much as \$50 an acre. The return to the operator is four to five times this amount. The coal mines use approximately one and one-half million linear feet each year, the sale of which brings the government about \$5000 and the operators about \$40,000 annually.

## LEPER COLONY NURSE RETURNS

Ostracized by Friends Becomes Dispirited—Will Go Back to Lepers.

Chicago, Oct. 21.—Miss Marie Collier who disappeared Friday, leaving a note saying that she had been ostracized by society because she formally was a nurse in a leper colony, returned yesterday.

She asserted that the unfounded reports that she was suffering from leprosy causing her friends to forsake her had so discouraged her that she had determined to shoot herself. She said that Miss Benjamin of Milwaukee, an acquaintance, had persuaded her not to end her life.

"I became so dispirited Friday that I decided there was no use living any longer," said Miss Collier. "I destroyed marks of identification on my clothing and as I was tearing up old letters I came across one from Miss Benjamin. In it she told me that if I ever intended to take my life to pay her a visit first. I told her a long time ago that I would kill myself some time."

"Miss Benjamin brightened me up and I now intend to go back to the lepers. I am an outcast of society. A number of doctors have made examinations and reported that I am free from leprosy, but my friends refuse to believe it. If I go to any gathering the crowd near me dwindles until I find myself standing alone."

"I have taken an inventory of my life and I can see no ray of hope. I sent letters yesterday to a number of leper colonies in the United States asking for a position as a nurse. In case I cannot get such employment in

## This Rich Butter—the Meat of the Finest Cream

Variation in cream qualities is the reason for the variation in butter qualities.

Jensen's Four-in-One Butter is the market's leader because the finest cream is used in its making.

We secure the entire mountain country for it.

We pay the highest prices and get only the best.

Still only about 40 per cent of the cream we gather tests high enough for "Jensen's Four-in-One."

We insure its purity by pasteurization.

Methods and standards like ours are costly. No other butter maker attempts them.

But only through them can butter the quality of "Jensen's Four-in-One" be produced.

You owe yourself and your family the duty of its use.

Jensen Creamery Co., Ogden
